PROFESSIONAL SUMMARY

Motivated Bachelor of Science in Information Technology student at Maseno University with a strong interest in software engineering, artificial intelligence, automation, and cybersecurity.

Developing practical experience in Python programming, web development, object-oriented programming, software architecture, and AI-assisted application development through independent technical projects.

Passionate about building scalable, user-focused digital solutions that address real-world challenges, particularly in education, digital inclusion, and technology accessibility across Africa.

Combines technical curiosity with teaching experience, problem-solving abilities, and a commitment to continuous professional development.

TECHNICAL SKILLS

Programming Languages

- Python
- JavaScript
- C and C++
- Java (Foundational knowledge)
- HTML5 and CSS3

Software Development

- Object-Oriented Programming (OOP)
- Modular Application Development
- Software Engineering Fundamentals
- Git and GitHub
- Application Debugging and Testing
- Database Fundamentals

Artificial Intelligence & Automation

- AI-Assisted Software Development
- Local Large Language Model (LLM) Experimentation
- Python Automation
- AI Application Prototyping

Tools & Technologies

- Visual Studio Code
- Git and GitHub
- Windows and Linux
- WordPress
- Arduino and Microcontrollers
- Microsoft Office Suite

Additional Knowledge

- Cybersecurity Fundamentals
- Computer Networking Concepts
- Technical Documentation
- Digital Research and Problem-Solving

EDUCATION

Maseno University
Bachelor of Science in Information Technology
2026 – Present

Currently pursuing undergraduate studies in information technology, with an emphasis on programming, software development, computer systems, and emerging technologies.

Meru School
Kenya Certificate of Secondary Education (KCSE)
Completed: 2025

TECHNICAL PROJECTS

Bright AI — Personal AI Assistant

Python | Local Language Models | AI Experimentation

- Developing and experimenting with a personal AI assistant using Python and locally hosted language models.
- Exploring AI-powered programming assistance, technical learning, and intelligent user interactions.
- Investigating how AI tools can support software development and improve access to digital learning resources.

Student Management System

Python | Object-Oriented Programming | Modular Architecture

- Developing a Python-based application for managing student records and registration.
- Implementing input validation, student identification, and modular application components.
- Applying object-oriented programming and software engineering principles to practical application development.

TUCHAT — Software Development Project

Application Architecture | Software Engineering

- Exploring the development of a structured software application using modular architecture.
- Organizing project components to support maintainability and future feature development.
- Practising Git-based version control, technical documentation, and structured development workflows.

University Healthcare Management System

System Design | Full-Stack Development Concept

- Exploring the architecture of a university healthcare management platform.
- Designing concepts for secure, role-based access and structured healthcare workflows.
- Investigating how digital systems can improve healthcare administration and information management.

Robotics and Automation Projects

Arduino | Sensors | Embedded Systems

- Experimented with Arduino-based electronics, sensors, and automation concepts.
- Explored practical applications of microcontrollers in robotics and environmental monitoring.
- Developed hands-on problem-solving skills through hardware and software experimentation.

Bright Services Website

WordPress | Website Development | Content Management

- Designed and managed a WordPress-based website for digital services.
- Applied website customization, content management, troubleshooting, and web development fundamentals.
- Gained practical experience in maintaining a web-based digital presence.

PROFESSIONAL EXPERIENCE

Computer Studies Teacher
Isiolo Barracks Secondary School | 2026

- Supported secondary school students in developing computer literacy and practical digital skills.
- Explained computer concepts and guided learners through technology-related activities.
- Encouraged logical thinking, problem-solving, and responsible use of digital tools.
- Assisted learners in exploring programming, digital innovation, and technology career opportunities.
- Strengthened communication, mentorship, and technical presentation skills.

LEADERSHIP & COMMUNITY ENGAGEMENT

Technology Mentorship and Digital Skills Development

- Support learners in developing digital literacy and practical technology skills.
- Participate in technology learning communities and collaborative technical discussions.
- Promote continuous learning, knowledge sharing, and responsible technology use.
- Advocate for innovation and digital inclusion as tools for youth empowerment.

PROFESSIONAL DEVELOPMENT

- Independent learning in Python programming, software engineering, artificial intelligence, and cybersecurity.
- Practical experimentation with AI development tools and modern software development workflows.
- Continuous development of programming skills through technical projects and documentation.
- Exploration of emerging technologies, including intelligent systems, automation, and embedded computing.

CORE COMPETENCIES

- Analytical and Logical Thinking
- Technical Problem-Solving
- Continuous Learning and Adaptability
- Communication and Knowledge Sharing
- Teamwork and Collaboration
- Creativity and Innovation
- Research and Technical Documentation
- Time Management

AREAS OF INTEREST

Artificial Intelligence | Software Engineering | Cybersecurity | Robotics | Automation | Digital Innovation | Educational Technology

LANGUAGES

- English — Professional Proficiency
- Kiswahili — Professional Proficiency
